

# HAPPY 40TH BIRTHDAY!!

**If you're reading this with outstretched arms or have enlarged the image on your phone, welcome to the club! You may be like millions of other people 40 and older living with presbyopia.**

"Presby-what?!"

Presbyopia is a common condition that develops, usually around age 40, when your eyes begin gradually losing the ability to focus on things up-close. But don't panic, there are options that won't require you live a life of losing, breaking and re-buying reading glasses.

Call your Eye Care Professional today to learn more about how you can get a free\* trial of DAILIES TOTAL1® Multifocal contact lenses that can help you see near, far and everywhere in between.

**For a free trial certificate, visit  
[www.SeeNearAndFar.com/40thBirthday](http://www.SeeNearAndFar.com/40thBirthday)**

*\*Eye exam may be required before lens trial. Professional fees may apply. Offer available at participating offices.*

**Rx only**

Ask your eye care professional for complete wear, care and safety information.
