

2023 ARI Grant Recipients

Adriana Di Polo, PhD

Senior Grant Award

University of Montreal

Research Title:

Uncovering the Root of Retinal Ganglion Cell Dysfunction in Glaucoma: Identification of Novel Mechanisms and Therapeutic Targets

Gulab Zode, PhD

Senior Grant Award

University of California, Irvine

Research Title:

Non-Viral Delivery Methods of Genome Editing for the Treatment of Glaucoma

Thanh Hoang, PhD

Young Investigator Grant Award

University of Michigan

Research Title:

Suppressing Notch pathway in retinal Müller glia: A path towards restoring lost retinal neurons

Masayuki Hata

Young Investigator Grant Award

Kyoto University

Research Title:

Immune Aging in Vascular Remodeling and Subretinal Fibrosis in AMD

Brian Leonard, DVM, PhD

Young Investigator Grant Award

University of California, Davis

Research Title:

Determining the effect of a rabbit nonpolar lipid (rNPL593) on corneal inflammation and corneal innervation in a murine model of evaporative dry eye disease (EDED)

Debarshi Mustafi, MD, PhD

Young Investigator Grant Award

University of Washington

Research Title:

Targeted long-read sequencing to identify phased pathogenic variants in inherited retinal diseases

Melina Agosto, PhD

Young Investigator Grant Award

Dalhousie University

Research Title:

Synaptic protein trafficking in photoreceptors and bipolar cells

Sun Young Lee, MD, PhD

Young Investigator Grant Award

University of Southern California

Research Title:

Cell-free Rejuvenation of Aging RPE
